

## Lizard Mask

This lizard mask is sized for kid faces. You can prepare the masks ahead of time so they are ready to color. Share images of local lizards if the kids want to make their mask look like a specific kind of lizard.

### Instructions:

1. Print this onto card stock. This is A4 sized.
2. Add a small square of white duct tape or other tape to the back of the mask behind the 'X' marks on the sides (optional, for strength).
3. Use a utility knife to make cuts on each of the 'X' marks. The ones on the sides are for attaching the string or elastic. The ones in the eyes are so you can insert scissors to cut out the eyes.
4. Cut out the eyes and cut around the lizard face. This can be done before or after coloring the mask.
5. Attach the string or elastic.
